1.0 to 4.0 m max. 4,6 m PVC + fibre glass, weatherproof (2x) 100 mm x 100 mm 1200 mm x 1000 mm max. 20 kg (25 kg available) 4 to 14 cm/sec. (other cm/sec. for request available) +/- 0,5 cm approx. 4 sec. +/- 0,5° 3 Kevlar toothed belts (metal free) electronic EC motor 300 W fibre optic cable, POF type (standard) shielded and radio interference suppressed; 20dB under Class B +10°C...+40°C max. 3,2 A 115 / 230V (50-60Hz)

The TW4000-EP antenna mast is suitable for use in either open areas or in electromagnetic absoption chambers. Metal parts are located only in the base plate and the drive mechanism (max. 0,4 m above ground level).

Adapters for all commercially available antennas are available. Special designs on request. All antennas during polarisation rotate around their axis so as to eliminate any elevation errors. Limit switches and the

general mechanical design ensures a reliable system operation.

The **GPIB** (**IEEE 488**) **bus**, when operated wit the CO2000 Controller, or **GPIB** (**IEEE 488**) & **LAN** (**TCP/IP**), when operated by <u>CO3000</u> Controller provides an additional control option for all functions.
