

Dual Turntable

Diameter outer area	5,0 m
Diameter inner area	2,5 m
Load capability	5000 kg
Dynamic capability outer area	5000 kg
Dynamic capability inner area	2000 kg
Min. Height	750 mm
Rotation speed outer area	0,5...2,0 rpm
Rotation speed inner area	0,5...3,0 rpm
Positioning accuracy	+/- 1°
Drive unit	shielded and radio interference suppressed; 20dB under CISPR 22 Class B

Brief description

Dual turntable is designed for flush mounting into a raised floor, with stainless steel carrier plates on galvanized steel structure, stainless steel environment and high efficient contacting with copper beryllium hollow core tube.

Both rotating areas are designed concentric and can be driven separately without mechanical locking/unlocking.

The drives are shown and driven as separate units form controller.
